

Phillip T. Nigro, M.D.

Orthopedic Surgeon

Fellowship-trained in Shoulder and Elbow Surgery

Dr. Phillip Nigro specializes in shoulder and elbow surgery, fracture care, knee and hip replacement, sports medicine, and general orthopedics. He has a special interest in complex shoulder and elbow fractures, shoulder and elbow arthroscopy, and

sports surgery of the upper extremity. In addition, Dr. Nigro's fellowship provided him with specialty training in shoulder and elbow replacement, including reverse shoulder replacement, sports surgery, and expertise in arthroscopic rotator cuff and labral repair. Dr. Nigro combines his leading-edge expertise in shoulder and elbow orthopedics with a patient-centered approach to always seek the best solution for each patient, first considering nonoperative options such as physical therapy and medication. Dr. Nigro devotes time and attention to gaining a solid understanding of each patient's unique situation, seeking the best approach for that individual.
